

E65S

THE NEW ICON OF ESPRESSO GRINDING

August 2019

ditting

E65S | At a glance

KEY FEATURES

- **Proven premium grinding profile**
guarantees the optimal particle size
- **Modern ground-breaking temperature management system**
cools down the motor continuously
- **New pioneering grind adjustment technology**
to set and keep the perfect degree of fineness
- **Innovative icon menu and multifunctional turn- & push-button**
for easy intuitive operation
- **Adjustable and removeable spout**
for centered espresso grinding into the portafilter
- **Rocksteady portafilter holder and super-robust bean hopper**
for ultimate workload resistance
- **Slim modern corpus**
with noise optimization

E65S | Indestructible hopper

Ultimate workload resistance

Super-robust material

Permanently fixed to the adapter by screw connection

1,2 kg capacity

Smart clip on the lid for a note on the blend or specific instructions on the recipes

E65S | Premium espresso grinding profile

Great taste experience

- 65 mm hardened steel burrs with proven burr geometry
- Grind-adjustment for particle size range from 180-580 μm within 80 increments
- Anti-static spout allows the grounds to flow into the portafilter entirely clump free
- Dose deviations of max. 0.4 g at 100 shots straight

E65S | Sensory analysis

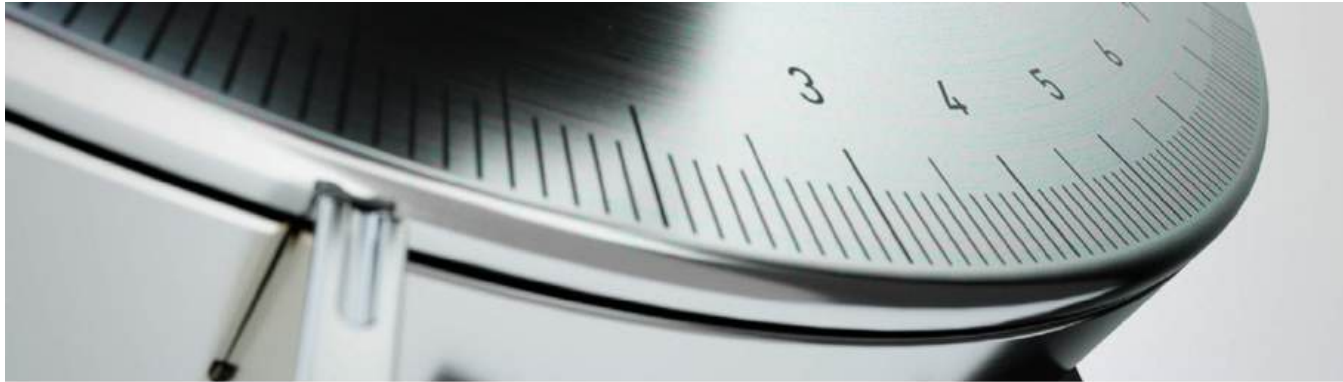

COMPARISION: Particle size distribution curves of the E65S

- The E65S got set to following recipe:
17 g in and 34 g out at 30 sec. extraction time
- The grinder provide optimal particle size profiles for high extraction rates
- The grounds of the E65S provide more uniformity in the particle size
(the majority of the particles have a similar size)
- The E65S provides minimal clumping and therefore minimal channelling

E65S | Pioneering grind adjustment

Setting and keeping the perfect degree of fineness

Ultrafine thread inside the grind-adjustment mechanism

An auto-lock system keeps the adjustment in place

The setting doesn't get changed with grinding degree slide on the backside of the grinder

E65S | Innovative icon menu and multifunctional turn- & push-button

Easy intuitive operation

Large 2.4" display for optimal control

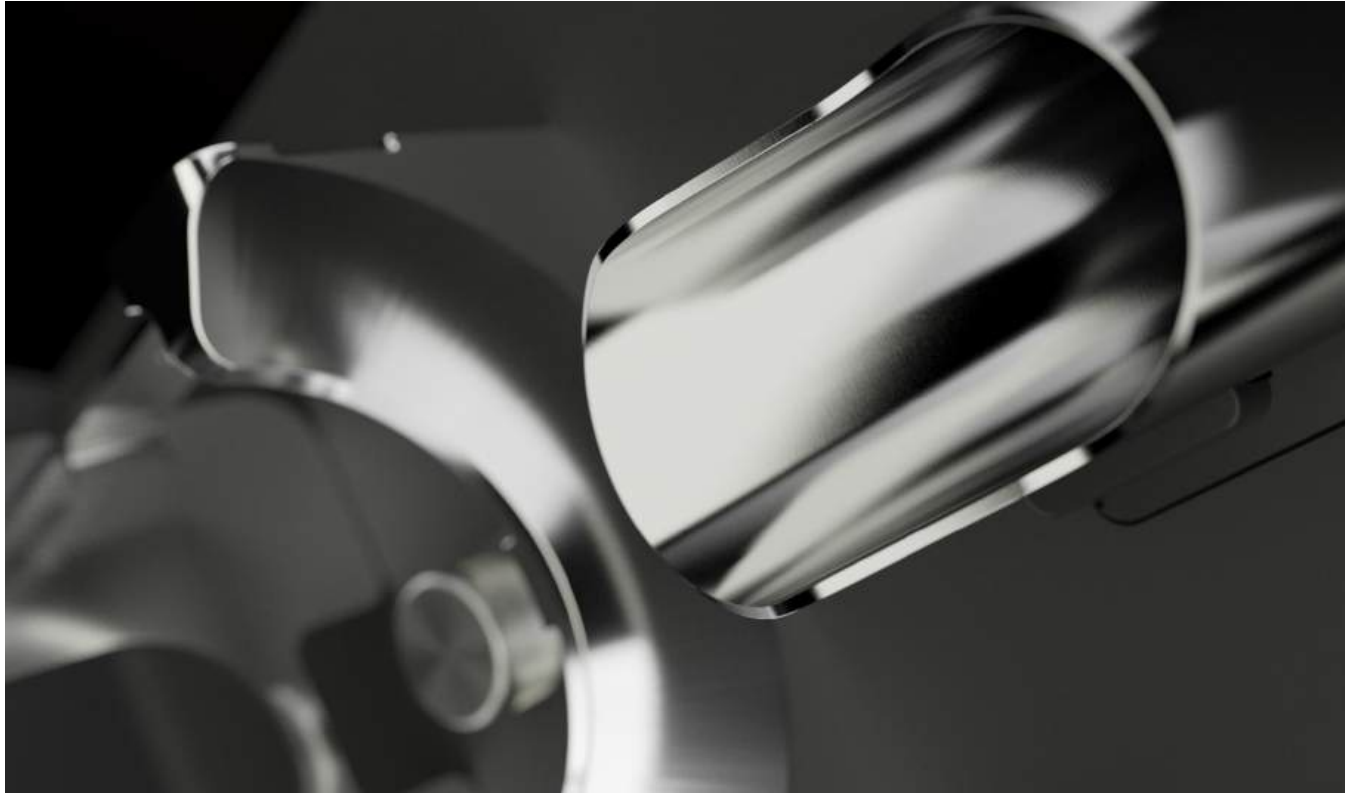

Multifunctional controller for intuitive menu navigation

Up to 6 easily programmable recipes

Preset service alerts and a variety of statistics

E65S | Adjustable and removable spout

Perfect fit for any portafilter

Revolutionary design

Anti-static material

**Simply pushing or pulling for
perfectly centered espresso
grinding**

Removable for easy cleaning

E65S | Rocksteady adjustable portafilter holder

Perfectly adaptable for any portafilter

**One size fits all:
easy adjustment by loosening
2 screws only**

**Sturdy metal sheet of the
portafilter holder**

Robust start/stop switch

E65S | Slim modern corpus incorporating noise optimization design

The perfect match for any espresso bar

footprint
19.5 cm (wide) x 28.3 cm (depth)
Weight
21.8 kg

**Silent and pleasant
grinding noise at below 70dBA**

Compact modern design

**Slim corpus design with a small
footprint**

E65S | Easy service and maintenance

Saving valuable resources

- Easy access to the burrs and the built-in grinder, as only 5 screws need to be loosened
- Screws only need to be loosened, meaning no lost screws inside the grinder
- During the burr change, the adjusting ring retains its position and does not have to be readjusted afterwards
- Easy zero setting recalibration via hand wheel

E65S | Technical data

PRODUCT SPECIFICATIONS

Model	E65S
Color	Stainless steel, matt black / Stainless steel, matt black & white
Bean hopper capacity	1.2 kg
Voltage / Frequency	100 V // 50 Hz // 1~; 100 V // 60 Hz // 1~; 110 - 127 V // 60 Hz // 1~; 220 - 240 V // 50 Hz // 1~; 220 - 240 V // 60 Hz // 1~
Speed	1400 rpm (50 Hz); 1650 rpm (60 Hz)
Burrs	Special steel, Ø 65 mm
Performance	4-7 g/s
Weight	11.2 kg
Certifications	CE, CB, ETL Safety, ETL Sanitation
