

PERFECT  
MOOSE

Jack  
& EPIC JACK

**THE SMART STEAM FOAMER  
USED AS AN INDEPENDENT UNIT**

Perfect Moose is the smart, automated foamer which takes over for the busy barista, rescues the untrained and gives your customers a true treat worth coming back for. Using any milk type you like.

Your extra pair of barista hands.

Perfect Moose comes in 2 models: Greg & Jack

#### A. Touch display

Touch display guiding you through every step of the steaming process. No room for error.

#### B. Steam wand

Autonomously moving cool touch steam wand, releasing the right amount of steam at the right time in the right angle.

#### C. Nozzle

PEEK nozzle developed not to suck up any milk and positioned exactly right to create the swirling movement in the milk.

#### D. Temperature sensor

'Moose eye' monitoring the exact temperature of the chosen liquid during the whole steaming cycle.

#### E. Pitcher holder

Holder with integrated weighing scale measuring the exact amount of liquid. Underneath, the RFID reader processing information exchanged with smart Moose pitchers.

#### F. Hoofs

Anti skid, non marking hoofs.

## JACK & EPIC JACK

**Perfect Moose Jack** is the smart steam foamer equipped with its own boiler at the back. This solitary moose works completely independently and can be combined with all types of bar set-ups. Always use with smart Moose pitchers.

**Epic Jack** is Jack's big brother and can steam larger amounts of milk up to 1 liter pitchers, especially engineered for demanding coffee shops and chains with a high milk consumption. Both look exactly alike, except for the pitcher holder (not interchangeable between both devices).

#### Looking for a connected solution?

Check out Perfect Moose Greg, the smart foamer connected directly to your espressomachine.
